	The MAILING DATE of this communication app or Reply	pears on the cover sheet with the c	orrespondence address			
	Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1 and 3, and of the species

adiponectin, in the reply filed on 11/13/2006 is acknowledged. The traversal on the

ground that there is no single general inventive concept in the present claims carefully

considered and not found persuasive because, as already presented in the Office action

filed on 10/13/2006. "The inventions listed as Groups I-VI do not relate to a single

general inventive concept under PCT Rule 13. I because, under PCT Rule 13.2, they

lack the same or corresponding special technical features for the following reasons: The

special technical feature of groups I-III is adiponectin. The special technical feature of

groups IV-VI is an adiponectin gene. Each of the special technical features is shown by

the international search report filed with the present application to lack novelty or

inventive step and does not make a contribution over the prior art".

The requirement is still deemed proper and is therefore made FINAL. The claims

are objected to for including non-elected inventions. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

Application/Control Number: 10/502,051

Art Unit: 1647

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Scherer et al. The claims are drawn to an insulin resistance improving agent or a therapeutic agent for type 2 diabetes containing, as an active component, a C-terminal globular domain of adiponectin or adiponectin. Scherer et al. teach a method of modulating the insulin production by administering Acrp30 to an individual (p 5 lines 17-21). Moreover, the authors teach the use of portions of the Acrp30 that has the same function or activity of the whole protein (p 8 line 30- p 9 line15). The Acrp30 protein taught by Scherer et al has the Seq Id No: 7, which, according to the sequence search result available in SCORE, is IDENTICAL to SEQ. ID. NO: 2 (i.e., adiponectin) of the current application. Because the biochemical and biological properties of a protein are intrinsic to its structure, the adiponectin was clearly anticipated as well as its uses.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1 and 3 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/514715. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims have adiponectin as the active ingredient of the compositions and/or methods claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

5. No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elly-Gerald Stoica whose telephone number is (571) 272-9941. The examiner can normally be reached on 8:30-17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda G. Brumback can be reached on (571) 272-0961. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
